

# HOW TO PLAY

1. Run CardGameServerApplication using an IDE.
2. Run ClientApplication using an IDE.
3. Create a user if you are not already done by clicking "Don't have an account? Sign up free!".
4. Enter your username, password and e-mail and click Sign Up button.
5. Login using your username and password.
6. Click start game button to start.
7. In first level, you will play your cards in your hand in each round. Your goal is to collect cards in pile as much as possible.
8. In first level, ai will play so easy.
  - a. Ai sends a random card from its hand.
9. If your and opponent's hand is done, you should click deal card button to take new cards.
10. When you collect 151 or more points and your score is more than your opponent, you will be able to continue from level 2.
11. In level 2, the ai is more challenging but the rules are same.
  - a. If there is a card matching with the card top of the pile, ai will throw that card.
  - b. If there is no matching card, and if there is a Jack card, ai will throw the jack.
  - c. Otherwise, ai will throw a random card.
12. If your opponent gets 151 or more points before you, you will lose. Please try again.
13. In level 3, a new feature is added. Now you and your opponent can make bluff. If you want to make bluff when its time is come, you should press the card you will throw and choose whether you will bluff or not.
  - a. The strategy of the ai will be the same as level2.
    - i. If there is a card matching with the card top of the pile, ai will throw that card.
    - ii. If there is no matching card, and if there is a Jack card, ai will throw the jack.
    - iii. Otherwise, ai will throw a random card.
14. In same way, your opponent will be able to make bluff. When it makes bluff, you should decide whether you will trust it or not.
15. If you again gain 151 or more point from level 3 and your score is more than your opponent, you will win the game single player part of the game and the multiplayer part will be started.
16. You will be notified when you matched with another player. Then, the multiplayer game will start.
17. In multiplayer part, you will play against a real player. You will wait until a match is found.
18. When a match is found, you will see the opponent's username and game will start in 3 seconds.
19. If you can get 151 or more point before your opponent, you will win the game.
20. Otherwise, opponent will win the game.
21. You will be navigated through the dashboard. You can start a new game now.
